

THABA

These spectacular rings, made of Fluorite and natural Amethyst, are named Thaba, rocky mountain. Its name is inspired by the magnificence of its irregular faceted stones, which reflect the light and offer brightness and colour intensity, turning every ring into a different and unequalled piece. Due to its size and originality, these two rings will become the "must" of this season.

KUBU

In order to match the ring Kubu, these splendid earrings share the same name Kubu and the round and feminine forms. Made of Fluorite and Natural Amethyst, they are perfect to emphasize the beauty of every woman, reflecting the light in a unique way thanks to its transparency and the naturalness of its stones.

HUKU

White Agathe with Amethyst Crystal Rock together takes the form of this jewellery set. Cleared and feminine geometric forms, cheerful and summery colours come in this pendant together with a fabulous necklace made with small Amethyst Rock Crystal stones as well. Wonderful earrings and a grandiose ring bring the set in perfection. And just to finish the look, a powerful bracelet will delight the most daring women.

SHA

The rounded form of the hippopotamus inspires these rings "Kubu", hippopotamus in the African dialect "Setwana". Natural Amethyst, Pink Quartz and Fluorite shape up these rings of romantic colours, very feminine, perfect to complement spring looks. The veins and striate of natural stones, cut in "cabouchon", make every ring unique.
